

Insight Control Panel™

Powerful simplicity designed by and for Users

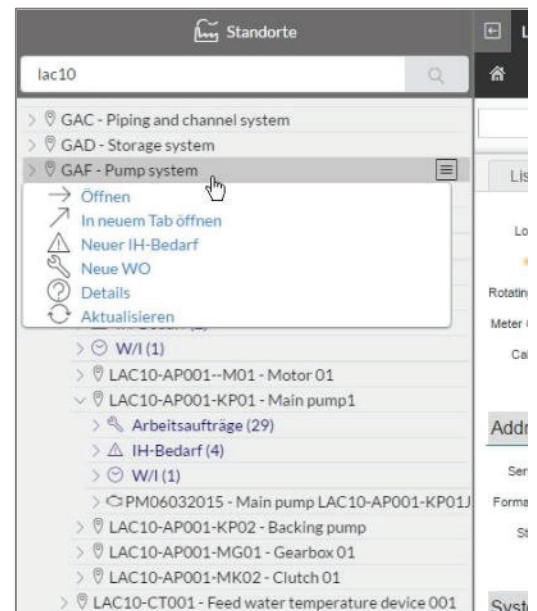

The Insight Control Panel modules extend the power of EAM systems by simplifying the end user experience, improving efficiency and data accuracy.

Insight Explorer™

Navigation tree for fast access on information

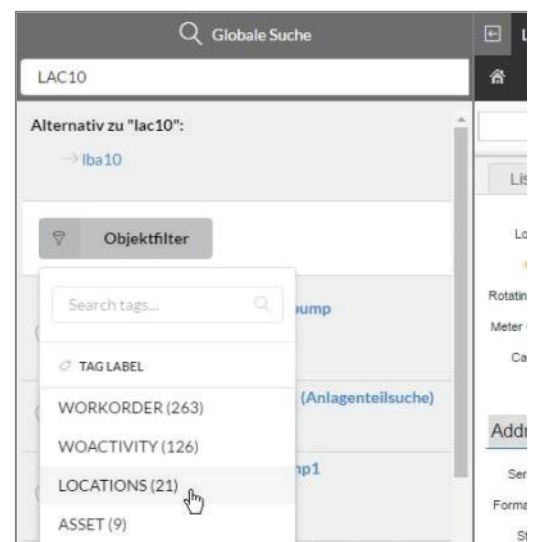

- ✓ Unified view of all linked objects
- ✓ Easy access to all assets, objects and items
- ✓ Start actions by a single click
eg. Create service requests, work orders
- ✓ Drag and Drop information into EAM application
- ✓ Search function with integrated auto-completion

Insight X-Ray™

Embedded Enterprise Search for instant full text retrieval

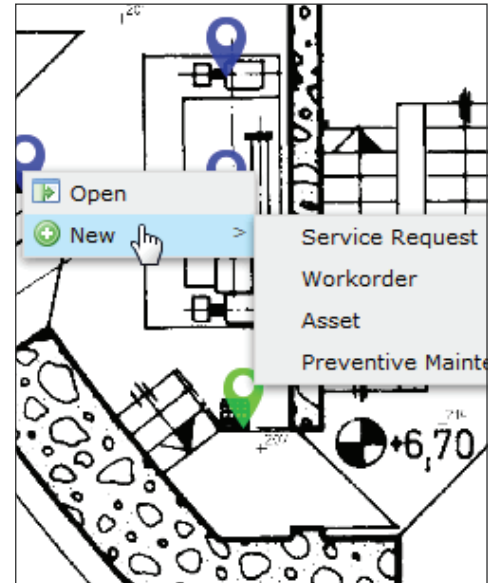

- ✓ Search over multiple data sources
- ✓ Simplifies complex searches by using a central single search field
- ✓ High performance near real time search
- ✓ Display of object details including short description

Integrated spatial view of your assets

- ✓ Integrated spatial view of your assets
- ✓ High performance visualization
- ✓ Display of Information eg. status of work orders and service requests on a Map
- ✓ Easy Drag and Drop interaction with Insight Explorer
- ✓ No browser plugins required

About GiS

GiS - Gesellschaft für integrierte Systemplanung mbH is an international operating independent specialist for the consultancy, conception, optimization and implementation of maintenance management systems (EAM systems) for asset intensive industries including conventional power plants and renewables, automotive, oil & gas, plant engineering and chemical industries. Today GiS is market leader for EAM systems in the German-speaking energy market with solutions successfully implemented in power plants of well-known energy companies with an asset value of more than 17 billion euros.

In times of the Industry 4.0, mobility and liberalization of the energy sector, software solutions are becoming an incremental part of the mapping and implementation of holistic processes. These processes are implemented in software solutions by GiS. For this purpose, state of the art technologies are smartly connected, so that the user can work with an integrated system. As a result, customers can react immediately to the accelerating market dynamics.
